MEGHAN TOBIN

(978) 844-6333 | megt1310@gmail.com | linkedin.com/in/meghantobin/ | https://meghan-tobin.github.io/

EDUCATION

University of Illinois at Urbana Champaign *August 2020 - December 2023*
Bachelor of Science in Computer Science

EXPERIENCE

Software Engineer II | Everfox - Common Platform *January 2025 - Present*

- Led development of Magic Mirror, a data-transfer platform bridging a global network and an air-gapped engineering environment. Scaled an early proof of concept into a mission-critical tool used by 10+ engineering teams. Defined the technical roadmap across architecture, reliability, and feature development, managing a team of engineers to deliver key milestones on schedule.
- Drove product planning by gathering requirements from engineering teams, identifying workflow gaps, and prioritizing enhancements to meet data-transfer needs and streamline engineering workflows.
- Orchestrated the company-wide rollout of Magic Mirror, coordinating implementation timelines with ongoing development and mitigating launch risks to ensure a smooth release.
- Improved Magic Mirror based on user feedback by building a dashboard for real-time transfer monitoring and self-service troubleshooting. Created training materials, documentation, and workflow guides to support onboarding and long-term operations.

Machine Learning Consultant | Private Client *September 2025 - January 2026*

- Partnered with the technical lead of an early-stage venture to define an ML approach for classifying voxelized LiDAR data, translating business requirements and technical constraints into a modeling strategy.
- Benchmarked multiple ML approaches to evaluate classification performance and tradeoffs, identifying promising solutions for distinguishing utility poles from surrounding vegetation and terrain.
- Synthesized experimental results into a recommended modeling approach and roadmap for future implementation, providing the client with a clear path toward production.

Software Engineer I | Everfox - Trusted Thin Client (TTC) *January 2024 - January 2025*

- Launched and managed an internship program spanning 5+ engineering teams, overseeing interviews, project selection, intern placement, and onboarding for 8 interns. Program success led to its expansion in all office locations.
- Directed intern-led engineering projects from planning through delivery, including a hardware testing suite that replaced a manual process within the testing organization. Trained project leads in roadmapping, milestone planning, and execution.
- Delivered security and code quality improvements for core product teams, including seccomp hardening for government compliance and integration of Coverity static analysis into CI pipelines to automate code analysis and reporting.

PROJECTS | Github: https://github.com/meghan-tobin

Where's the Whimsy | Developing an iOS social app that lets users create, discover, and join local quests to encourage exploration and add whimsy to everyday life | Python, Swift, PostgreSQL
Safe Shelter | Developing an AI-assisted tool to streamline verification of animal shelters, nonprofits, and pet volunteer organizations by consolidating and evaluating relevant information | Python, FastAPI, PostgreSQL
Bijoux Breakdown | Built a web tool to help crafters and artists organize inventory and calculate pricing for handmade pieces | Rust, HTML, CSS, JavaScrip

SKILLS

Languages: Python, C++, Rust, C, Java, JavaScript, SQL, Swift
Tools & Technologies: Linux (RHEL), AWS, Google Cloud, Docker, Git, Jenkins, PostgreSQL, MongoDB, SELinux
